## **NATIONAL SUBSTANCE USE AND MENTAL HEALTH SERVICES SURVEY (N-SUMHSS)**

The N-SUMHSS is a voluntary annual survey of all active substance use and mental health facilities in the United States and its jurisdictions. The survey gathers data about the services that treatment facilities provide and summarizes information about the clients served.

The N-SUMHSS is being conducted by ICF on behalf of the Substance Abuse and Mental Health Services Administration (SAMHSA). ICF, an independent survey research company headquartered in Virginia, will send out invitations and reminders for completing the survey.

## **TWO SURVEYS, NOW ONE**

The N-SUMHSS replaces the National Survey of Substance Abuse Treatment Services (N-SSATS) and the National Mental Health Services Survey (N-MHSS) by combining questions for substance use and mental health facilities into one survey. If your facility participated in the N-SSATS or the N-MHSS before, you will find the questions and layout of the N-SUMHSS similar.

## **YOUR PARTICIPATION COUNTS**

Participation is voluntary, but your response is important so that your facility and the populations you serve are represented.

Only N-SUMHSS participants have the option of being listed in SAMHSA's online Behavioral Health Treatment Services Locator (<https://findtreatment.samhsa.gov>). Being featured on the locator may help you reach potential clients in populations you were not reaching before.

## **YOUR DATA MATTERS**

The N-SUMHSS is the most comprehensive source of substance use and mental health treatment data in the country. SAMHSA, other Federal, state, and local agencies, and behavioral health care professionals use these data to understand treatment availability and identify gaps in our nation's treatment services.

## **LEARN MORE**

Visit <https://info.nsumhss.samhsa.gov> for copies of the questionnaire, frequently asked questions, online tips, and other resources for completing the survey in English or Spanish.
